Monitoring Violations Annual Notice Template

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Grayville

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During [July 2025] we ["did not complete all monitoring or testing'] for [TTHM'S AND HAA5'S] and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time. There was nothing you needed to do at that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [this contaminant/these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
TTHM's	1 PER YEAR	1	July 2025	Taken 9-3-25
HAA5'S	1 PER YEAR	1	July 2025	Taken 9-3-25

What happened? What is being done?

Samples during July were sent on time but did not meet temperature requirments and samples were retaken on 9-3-25 and passed all standards and there are no risk to your water at this time.
